Art Unit: 1656

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group 1, claim(s) 1-5, 6, 11, and 12, drawn to method of making C4bp:TNFR fusion proteins recombinantly.

Group 2, claim(s) 1,5, 7, 9, 11-13, 15, 18, and 19, drawn to a method of making C4bp:BAFF-R fusion proteins recombinantly.

Group 3, claim(s) 1-5, 8, 10-12, 14-17, drawn to a method of making C4bp:Thrombopoietin agonist peptide fusion proteins recombinantly.

Group 4, claim(s) 1-5, 8, 10-12, and 15, drawn to a method of making C4bp:Somatostatin fusion proteins recombinantly.

Group 5, claim(s) 20 and 21, drawn to gene therapy with nucleic acid encoding C4bp:BAFF-R.

The inventions listed as Groups 1-5 do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Pasek et al. (WO 91 11461) teach the recombinant production of CD4:C4bp and therefore linking claims 1-5, 11, 12, and 15 lack a special technical feature.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is

the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Karen Cochrane Carlson, Ph.D. whose telephone number is 571-272-0946. The examiner can normally be reached on 7:00 AM - 4:00 PM, off alternate Fridays.
